Twining of West Trunk Sewer, Contract 1

CONSTRUCTION ACTIVITY

McNally Construction Inc. on behalf of the Region of Peel will be completing the construction of the Twining of the West Trunk Sewer, Contract 1 in the City of Mississauga. The construction of the 2400mm diameter sanitary gravity sewer will be constructed in tunnel and will be commencing this month.

This project consists of the construction of approximately 9,775m of 2400mm diameter trunk sanitary sewer to be constructed by tunnelling along Erin Mills Parkway, Argenta Road and Creditview Road, and for the construction of approximately 542m of 400mm diameter PVC watermain along Creditview Road.

The work to be done includes the excavation of ten tunnel access shafts, mining utilizing tunnel boring equipment, sanitary sewer construction including maintenance holes and restoration of all work areas.

Construction activities will be contained within construction compounds that will be completely surrounded with fenced hoarding and will be located away from the traveled roadway of Erin Mills Parkway to minimize any traffic impacts.

SCHEDULE

Construction will commence at two locations along Erin Mills Parkway. The first site will be located at the southwest corner of the intersection of Erin Mills Parkway and Rogers Road within the existing Dunn Park. The mobilization to this site will commence on or around June 10, 2013. The second site is located at the east side of Erin Mills Parkway just north of Eglinton Avenue. The mobilization of this site will commence in the first week of July 2013. The Twining of the West Trunk Sewer is a long duration project and will take approximately 3 years to complete.
