

HOME SECURITY CHALLENGE

Is your home likely to attract a potential burglar?

The home security challenge was developed to give you an indication of the level of security in your home. Take the Home Security Challenge and learn how a little time, effort and money can greatly improve your peace of mind in and around your home.

security chancinge and learn now a little
time, effort and money can greatly improve
your peace of mind in and around your home.
OUTSIDE HOME
Are there clear views of all windows and doors?
YES NO
The more private an area is, the more likely it is to attract the attention of a criminal. Trim trees and shrubs that block sight lines to your windows and doors, particularly basement windows.
During the evening is there visible interior or exterior lighting that gives the impression that you are home, even if you're not?
YES NO
Install outside lighting to eliminate dark areas around doors or windows. Use motion activated lights with a low intensity feature as an alternative to bright constant level lighting.
DOORS
Is there a convenient way of clearly seeing who is at your door without opening it?
YES NO
Every entrance door should have a convenient way of clearly

seeing who is there without opening it. For most doors this will require the installation of a wide-angle lens peephole or

door scope. This will allow you to keep your door locked while

assessing the visitor prior to opening the door.

Do all of your exterior doors have a deadbolt with at least a one-inch throw?
YES NO
Quality deadbolts should be installed on all exterior doors with
security strike plates.
Are the screws that secure your entry doors and the strike
plates located on the door jamb opposite the lock at least 2 1/2 inches long?
YES NO
Door kick break-ins to homes are common. Most door
installations use screws less than 1" in length. This results in a
door that appears secure but is relatively weak and easily prone
to being kicked in. To secure a door properly the screws should
be at least 2 1/2 to 3 1/2 inches long, and the strike plate should
have a minimum of four offset holes.
Have you taken stone to sainfares any windows leasted in
Have you taken steps to reinforce any windows located in or next to doors?
YES NO
Glass within 40 inches of a door lock can be broken and a
criminal can reach inside to unlock the door. The security of
windows at the sides of doors can be improved by adding a
polycarbonate panel (available at home improvement centres).
Call Crime Prevention Services for details.
SLIDING DOORS
If you have a sliding door, do you have screws in the top
of the track to prevent the door from being lifted out when they are in the closed and locked position?
N/A YES NO
There is a 1" gap at the top of sliding doors, which allows them
to be lifted in and out of their tracks. The addition of 3 flat-wood
screws in the upper track of the doors in the closed position will
prevent criminals from lifting them out.
If you have a sliding door, do you have either a hockey
stick in the bottom track or a security bar to prevent the
door from opening?
□ N/A □ YES □ NO
The standard locking pin on sliding doors is usually cast metal,
which is weak and easily broken. A snug fitting hockey stick
or security bar should be added to the door to prevent it from being pried.
A
WINDOWS

SLIDING

Do the sliding windows of your home have a:

 "pin" (removable nail like object drilled through the overlapping vertical frame at a downward angle),

- piece of wood in the track beside and above the window	WHEN AWAY
frame (flat-head-wood screws can be substituted for the latter), or	When you are away from home do you leave lights on timers
- secondary aftermarket locking device?	both inside and outside the home?
□ N/A □ YES □ NO	YES NO
Most window locks are easily broken. To prevent quiet entry, add	Timers make a home look lived in and will potentially avoid
