Project 21-1310A

PROJECT UPDATE

Watermain Replacement and Improvement Glen Erin Drive

The Region of Peel was working in your neighbourhood last year to replace the watermain along Glen Erin Drive. This work is required to maintain and improve existing water services.

At this time, we have:

- Replaced the watermain on Glen Erin Drive,
- Connected properties to the new watermain by replacing individual water service pipes and boxes on Glen Erin Drive,
- Temporarily repaired the driveways, road, curbs, sidewalk and sod (grass) where affected by the watermain replacement work.

Schedule for remaining construction and repair work

Construction was paused due to freezing temperatures. We expect to start work again on May 29, 2023 to complete the following:

- Repair / Complete the repair of driveways, road, curbs, sidewalk and sod (grass) where disturbed by the watermain replacement and associated work. This will include replacing the temporary asphalt repairs on driveways, curbs, sidewalks, and roads to complete the final restoration.

We plan to complete this work in summer 2023. These timelines are estimates, as weather and other unexpected events may impact our timelines. This work will be under warranty for two years from the completion date.

Contractor and working hours

The work will be completed by Vic's Group under contract to the Region of Peel. This contractor's normal working hours are from 7 a.m. to 7 p.m., Monday to Friday. These hours are consistent with the local municipality's bylaws. We understand this may cause some inconvenience, but shorter working days would require your neighbourhood to be under construction for a longer period of time.

Traffic and parking

We may need to temporarily close roads or reduce traffic to a single lane during construction. If we must reroute traffic, we will place signs giving directions. On-street parking will be reduced during construction when we are actively working on your street. **Please do not park on Glen Erin Drive** Between May 29 and June 9 as we will be working in the parking lane to restore the asphalt.

In-ground sprinkler systems

As the front lawn may be affected by this construction work, if you have an in-ground sprinkler system **we strongly recommend moving any sprinkler lines that are located in the municipal right-of-way or next to the sidewalk**. If you can't relocate these sprinkler lines, please send us a map created by your irrigation contractor or flag each sprinkler head that is located within one meter of the sidewalk, curb, or driveway. This will allow us to minimize the impact to your sprinkler system.

Repairing grassy areas

The contractor will replace any damaged sod (grass) on the boulevard or your front lawn and will take care of the new sod for 30 days. You can help the sod stay healthy by watering it. A longer 'deep root watering' works better to establish new sod than watering more frequently for a shorter time. Watering in the early morning allows more water to soak in instead of evaporating.

Temporary restoration

The City of Mississauga is planning to complete roadwork on your street within the next few years. As this roadwork may also impact driveways, curbs, sidewalks, and lawns next to the sidewalk, we will:

- Pave only the areas of the street directly disturbed,
- Fix damaged sidewalks and curbs using concrete,
- Patch your driveway to cover any places we disturbed, as the future roadwork may affect the bottom of your driveway. After the city paves your street, the driveway will be repaired by paving a stripe over the disturbed area, resulting in minimal seams in the final driveway.

The Region of Peel's repairs are temporary, as the City of Mississauga will complete restoration as part of their roadwork. Your city will send you a separate notice about this additional construction.

Driveway access

It may be necessary to block your driveway for a short time when crews are removing or placing asphalt or completing other construction activities. If so, we will knock on your door to notify you. If a trench prevents access to your driveway, the contractor will have metal road plates available to allow access if required. Whenever possible, we will work to ensure businesses can be accessed. Please contact us if you have special needs related to access.

Waste collection

If you receive waste collection from the Region of Peel, your garbage, recycling, and organics will continue to be picked up on your regularly scheduled day. It is the contractor's responsibility to move your garbage, recycling, and organics bins from the end of your driveway to a location where waste collection vehicles can pick them up. Empty containers will be returned to their corresponding addresses. Please make sure your house number is clearly marked on each bin. This helps us return empty bins to the correct address.

Vibrations

You could feel slight vibrations from the construction work.

Safety during construction

Construction zones require extra caution to keep everyone safe – pedestrians, cyclists, drivers, and construction workers. When driving, walking, or biking through the construction area, please be aware of your surroundings, watch for construction crews and other road users, slow down, account for delays, and consider other routes if possible. To learn more about how to stay safe in construction zones, visit peelregion.ca/workzonesafety

Keeping you informed

We will let you know if there are any major changes to the plans.

Receive timely updates right to your inbox by signing up for e-notices at peelregion.ca/construction
Information on this project can also be found at peelregion.ca/pw/construction/miss/21-1310A.htm

Thank you for your patience as we complete this necessary work. This work will allow us to continue providing you with high quality tap water. If you have any questions, please contact us.
