

**ADVANCE NOTICE**  
**March 2024**

**Noise Attenuation Wall Replacements**  
**Erin Mills Pkwy (Regional Road #1)**  
**City of Mississauga, Project 22-4517**

Dear Property Owner,

The Region of Peel will be replacing noise attenuation walls in your area in 2025. The Detailed Design has recently commenced, and we will be looking at options to have this project expedited.

The various locations for the new noise attenuation walls, along the west side of Erin Mills Parkway are as follows:

- Britannia Rd to Banfield Rd;
- 320m south of Banfield Rd.

**Keeping You Informed**

The project is in the early stages, so the exact start date for construction is not available at this time.

A few months prior to construction starting, the Region will be sending you a letter requesting your permission for the Region's staff, consultants, and contractors to enter onto your property to perform the following activities during construction:

- Completely remove existing noise walls at the rear/side of your property;
- Construct temporary fencing to isolate the construction area from the remainder of the rear yard in order to maintain security and privacy of your backyard and;
- To construct the new noise wall.

Immediately prior to construction, you will receive additional notification regarding the timing of the project.

**If you would like to speak with us about this work, please contact:**
